

Momoda 3D Visualization Software

for Security Surveillance

Momoda 3D Visualization Software for Security Surveillance

Momoda is the leading 3D visualization solution for the security industry. Users can create real life 3D scenes and design CCTV camera layouts. Using Momoda's API, 3D scenes can be easily integrated with existing video surveillance systems.

- **Real Life 3D Scenes**
Browse real life 3D scenes by using zoom in, zoom out and rotation features, along with camera live feed, real time sensor data and other surveillance related functions.
- **Easy-to-use Editor**
Create scenes with easy-to-use 3D scene editor, supported by a large number of online building and security device models.
- **Connect Your Security Devices**
All Real Time Streaming Protocol (RTSP) based surveillance cameras are supported.
- **Powerful API**
Momoda's open API allows user to develop customized solutions.
- **Available On All Platforms**
Run in web browser and on mobile devices.

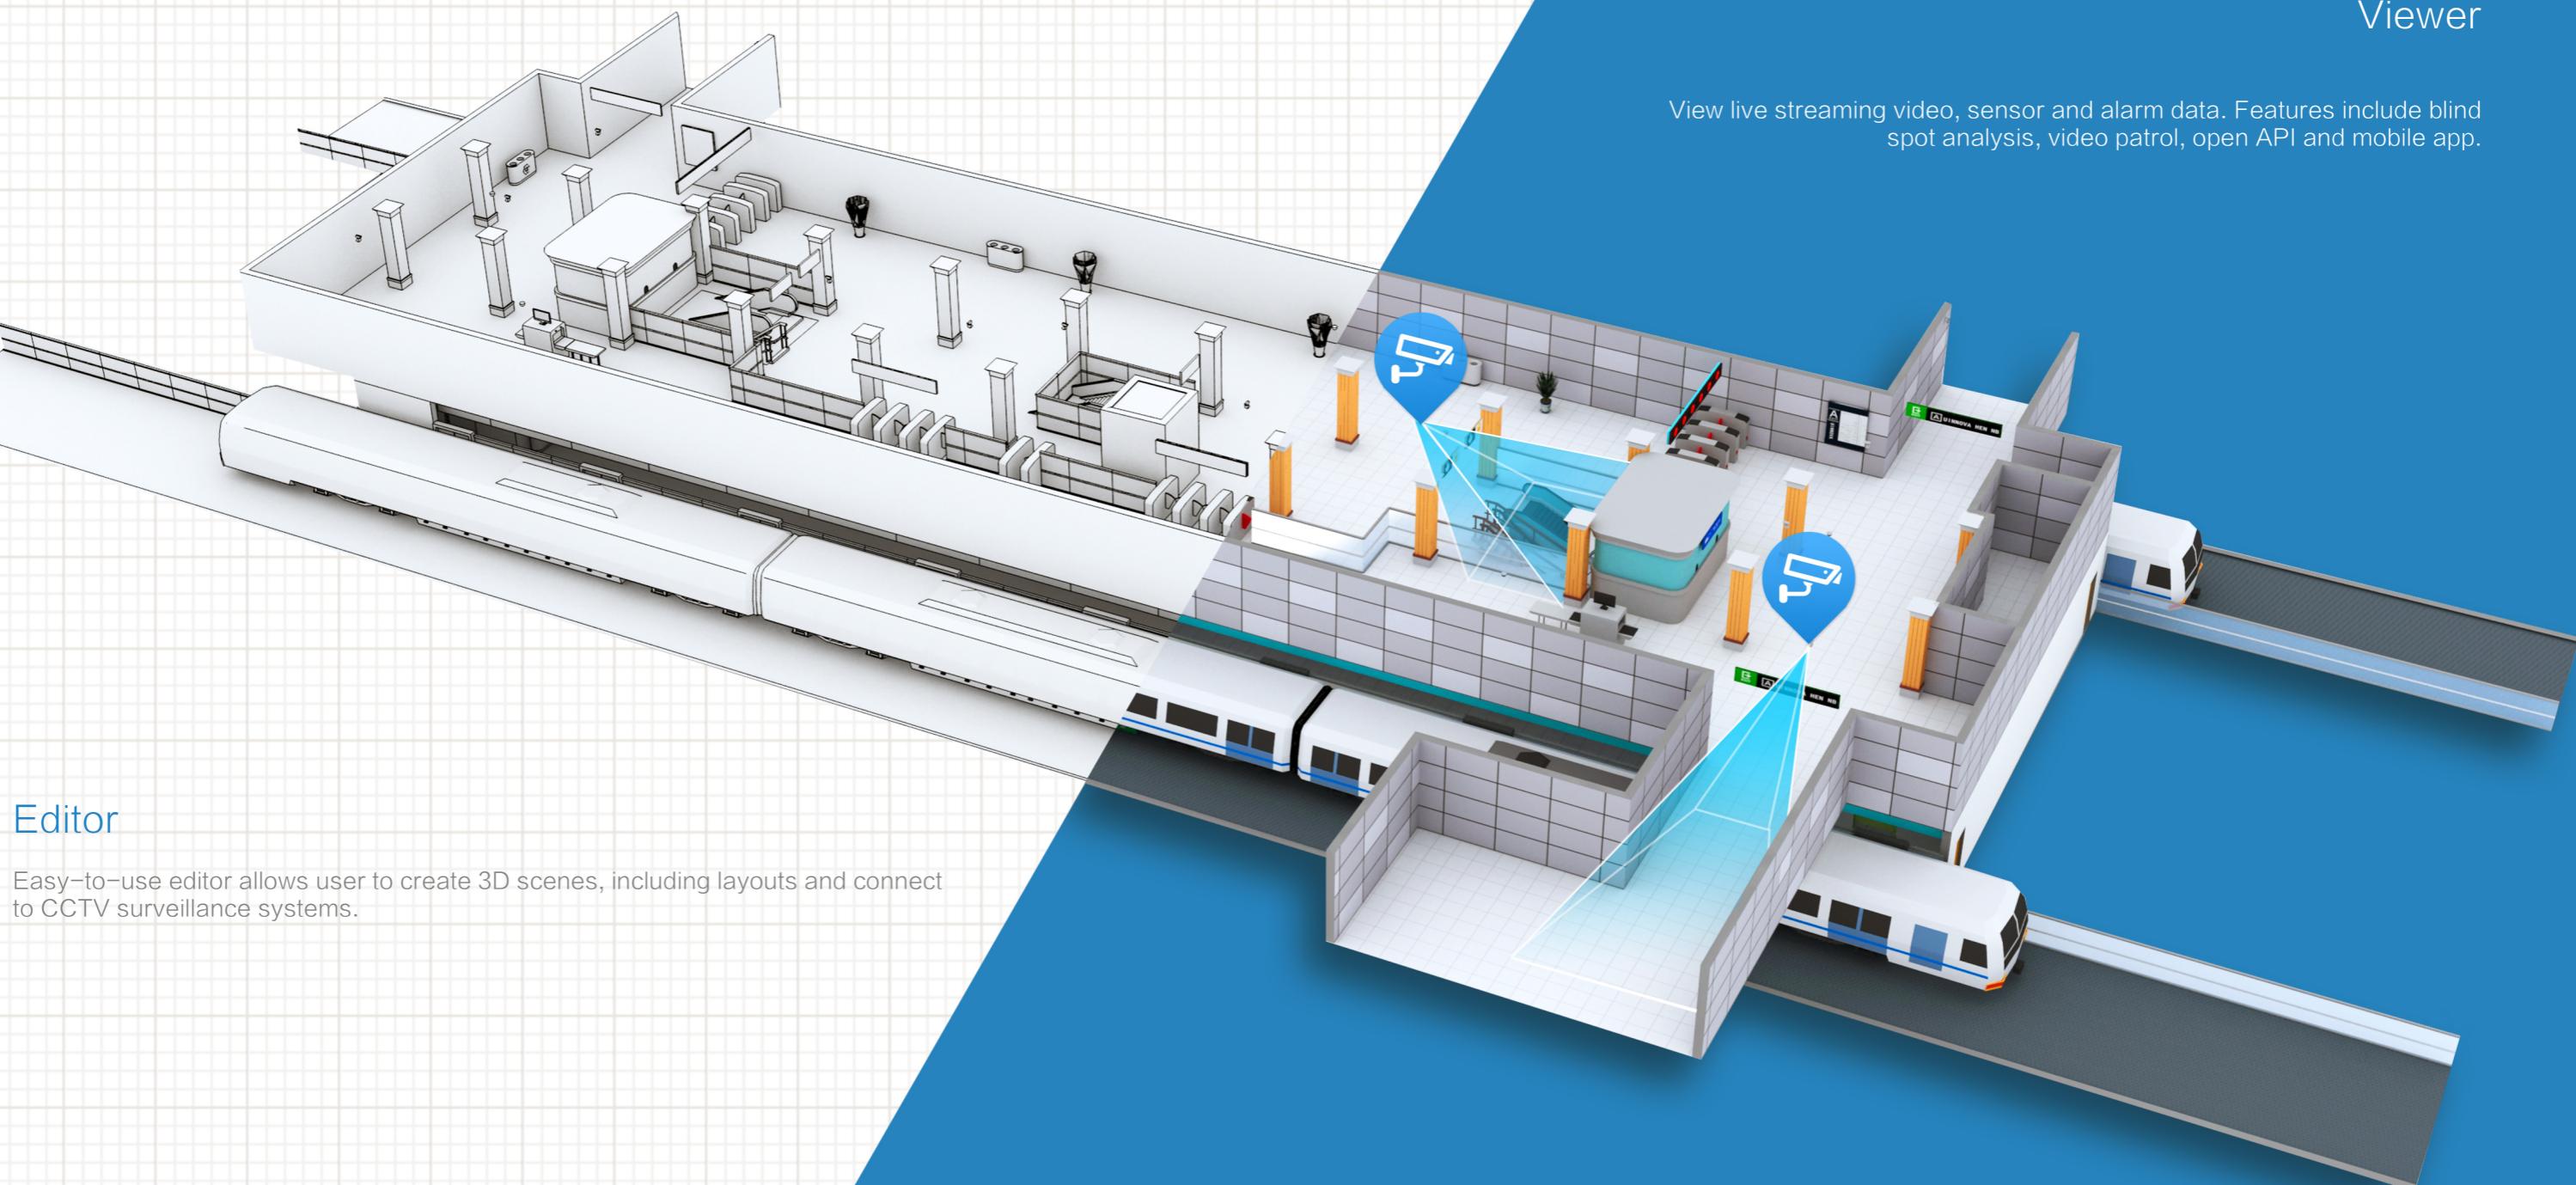

Features

We're also on Mobile

Editor and Viewer

How it works

It's Simple and Easy

Step 1 Download Editor

Download FREE Momoda Editor at <http://uinnova.com/mmd-ss>.

Step 2 Create a 3D scene

Create a 3D scene with security device layout. Professional service is also available.

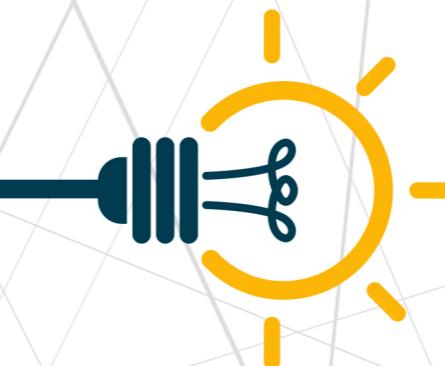

Step 3 Connect to surveillance system

Configure and connect Momoda to CCTV and other security devices.

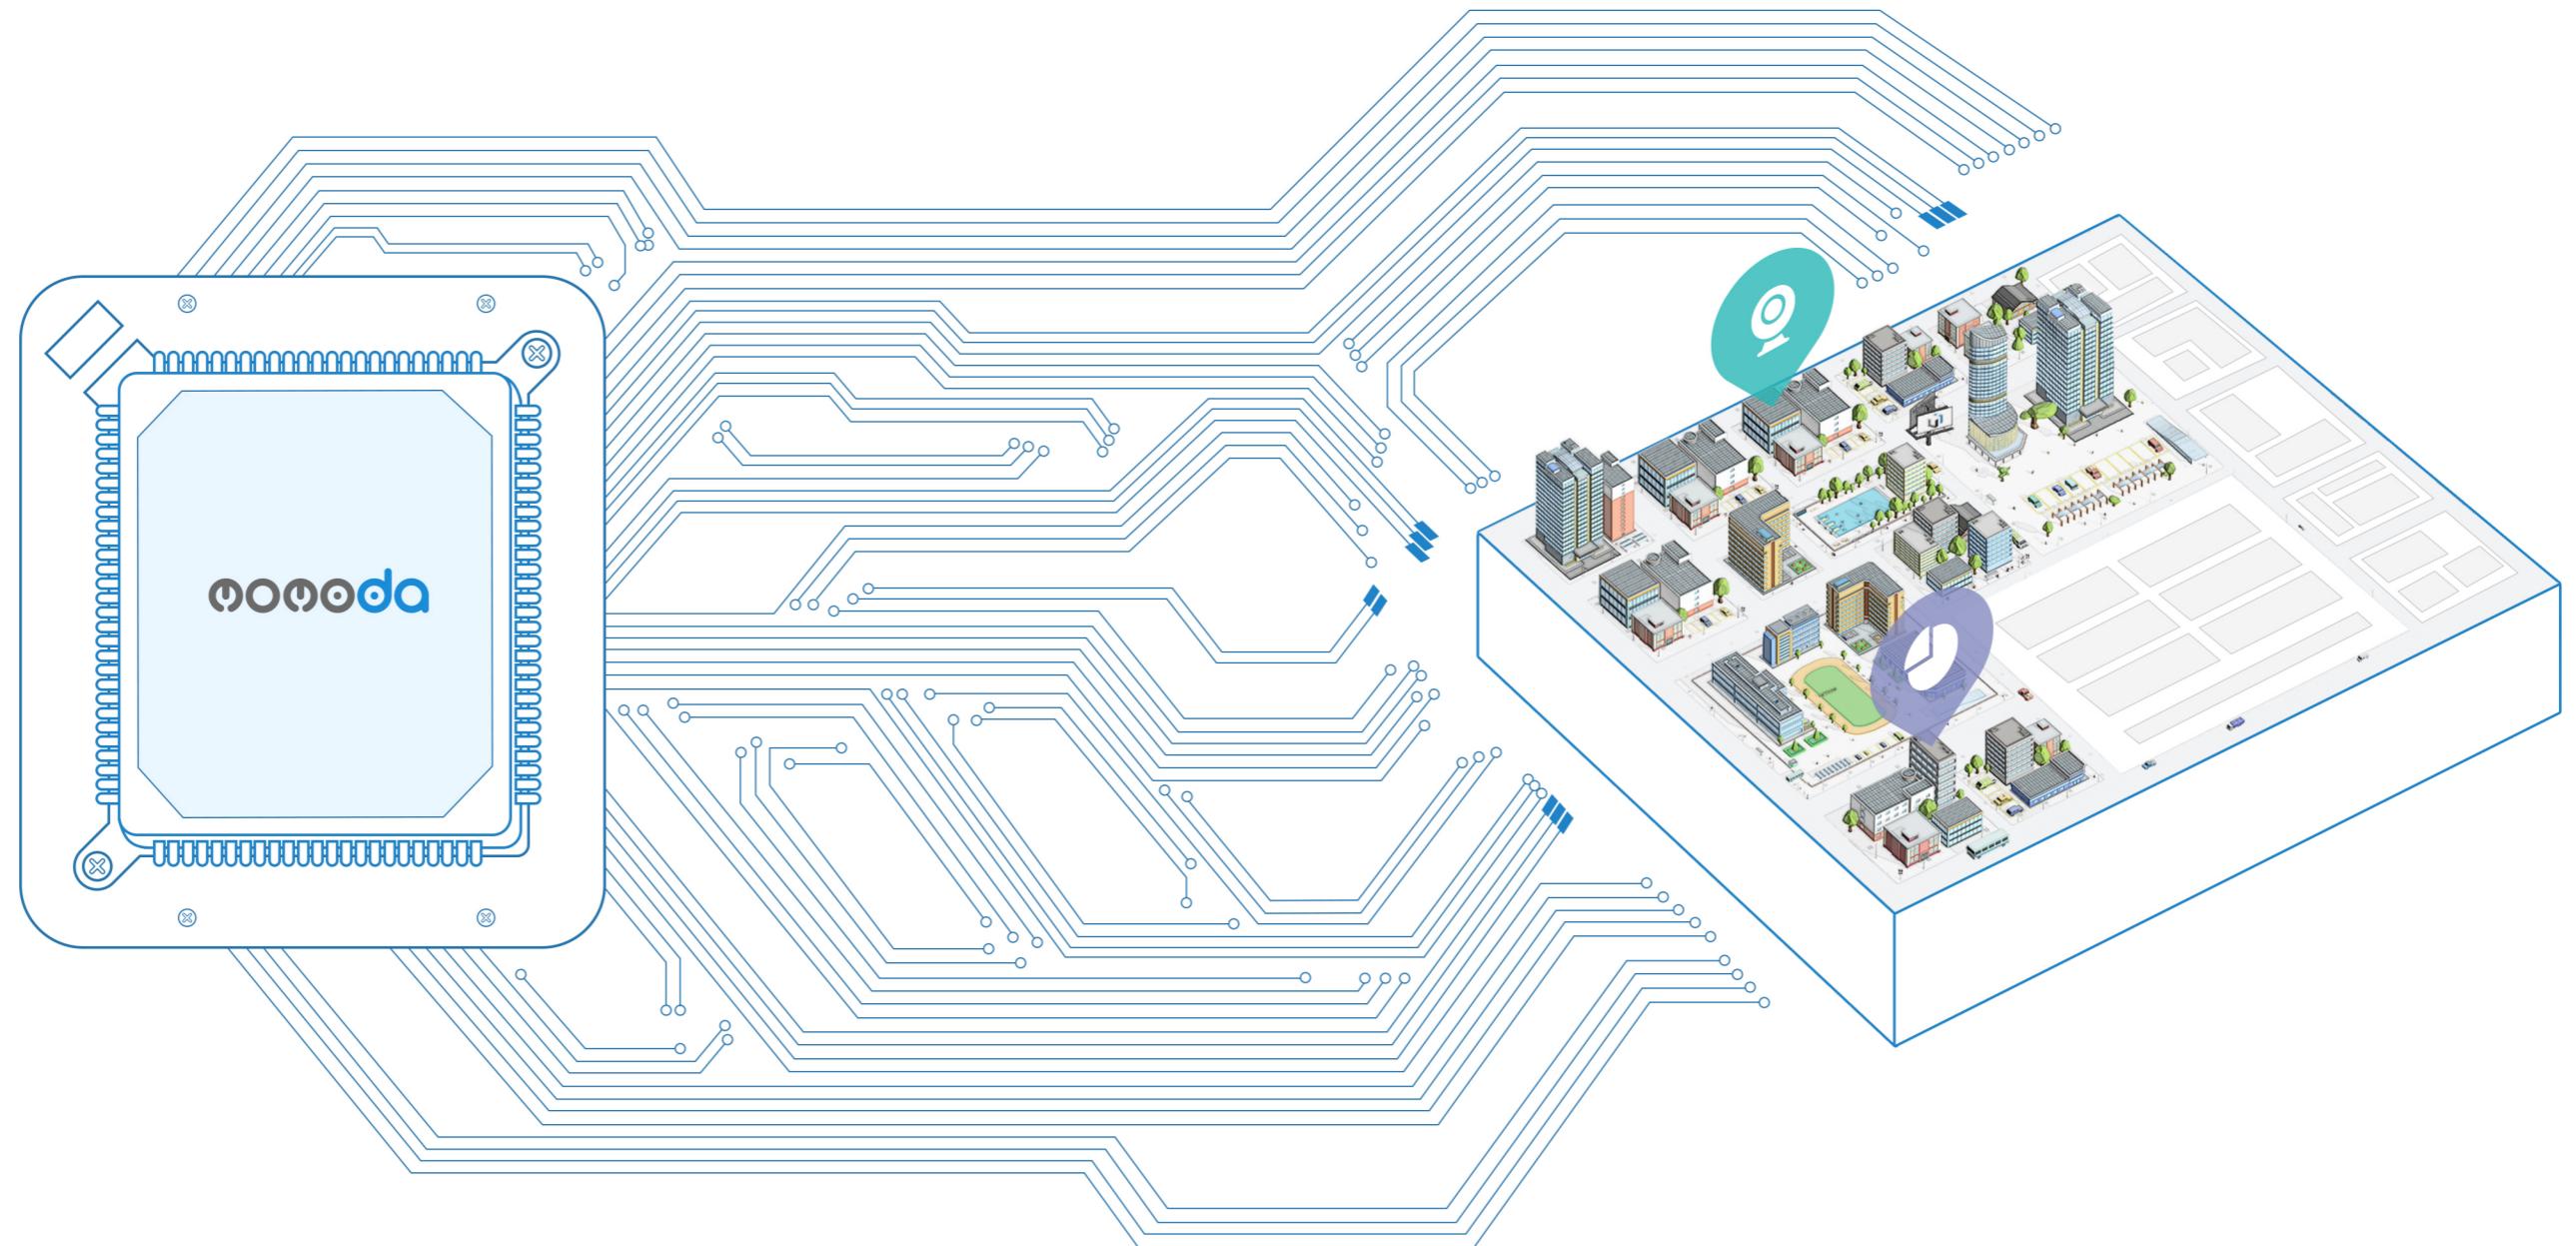

Step 4 Download Viewer and apply for license

Your 3D surveillance system is ready!

Open API

Open API with HOWTO documents

Powerful API allows you to customize and integrate with 3rd party systems easily.

Supported technologies include iFrame, javascript, message queue, web service, etc.

Mobile SDK is also available.

Our Vision

Make IoT Visible.

Who are we?

uinnova technology inc was founded by a group of experienced 3D and IT management professionals. The members of the leadership team previously held management positions at HP, IBM, Cisco, BMC and Opsware.

The company worldwide sales HQ is located in Seattle, United States. We have offices in US, South Korea and China, and resellers in other countries.
